We have recently launched our new website, please take a look..

www.ajsconstructions.co.uk

"Structural Steel Work for Residential renovations, Siston, Bristol"

We are delighted to have been awarded our CE accredited standard, which covers fabricated structural steelwork. The CE mark also applies to constituent products, including steel beams and bolts, as well as fabricated elements and systems.

This certification indicates that we produce steel-work of the highest quality, meeting the Standards and Regulations defined by the European Union.

Our certified coded welders provide you with the guarantee of compliance to provide bespoke solutions to a full range of structural and architectural components.

So whether you need a complete build service from groundwork up or

construction on an existing site be assured that we approach each job with a fresh perspective using our experience and knowledge to ensure that your project is delivered to your satisfaction.
Click [here](#) to visit our website home page,

We look forward to working with you in the near future.
